

International Conference on Emerging Educational Technologies and Yoga Practices for Developing India as a Global Knowledge Hub

Nitin Kumar, Assistant Professor (Yoga), S.V. Jain College, Bhadra (Rajasthan)

Abstract

This conference focuses on the integration of emerging educational technologies and traditional yoga practices to position India as a global knowledge hub. It examines how innovations such as artificial intelligence, digital learning platforms, virtual classrooms, and data-driven education systems can transform teaching and learning processes. In parallel, yoga practices are highlighted for their role in enhancing concentration, mental health, and holistic student development. The conference brings together scholars, educators, and policymakers to discuss sustainable and inclusive strategies for strengthening India's educational excellence on a global scale.

Keywords: Emerging Educational Technologies, Artificial Intelligence, Digital Learning, Virtual Classrooms, Yoga Practices, Holistic Education, Knowledge Economy, Higher Education Innovation, India Education System, Student Well-being
